DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,4, 7-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over McIntyre et al. in view of Branchinelli et al. The rationale from the last Office action is incorporated herein by reference. Further is noted that Branchinelli suggests the use of a second safety razor for trimming. Obviously one of ordinary skill in the art would use a transverse trimmer in place of the straight razor of McIntyre.

Conclusion

The remarks have been considered and the rejection based on Melton dropped. Applicant's remarks concerning the Fig. 7 embodiment of McIntyre are appreciated. As far as the limitation to a transverse trimmer the secondary art shows one. It would appear obvious to substitute one razor for another absent a showing of criticality. In other words this is a design feature that one would expect to be routine for an artisan to provide. The earlier allowance of claim 5 is regretted.
